Journal of Biomedical Materials Research
Subject Index to Volume 67B

600-grit polished Nitinol and wire/tubing surface conditions, 193

Absorbable polymer, 697
Acid resistance, 425
Acrylic bone cement, 457, 502
Acrylic cement, 44
Adherence, 391
Adhesion, 399, 414, 532
Adhesive, 324
Adsorption, 391, 532
Agarose diffusion test, 722
Aging in boiling water and heat treatment, 193
α-TCP, 27
Alternate soaking process, 429
Alumina matrix composite, 567
Alumina-glass composite, 233
Amalgam, 627
Amorphous diamond, 410
Amorphous oxide, 193
Aneurysms, 429
Animal model, 581
Animal study, 447, 603
Anodization, 520
Antibiotic elution, 137
Aortic wall, 356
Apatite-agarose composite, 680
Apoptosis, 133
Arthroplasty, 99
Artificial hip joint, 425
Autologous bone, 526

BAG^1, 364
BAG^2, 364
Bioactive cement, 262
Bioactive glass, 163
Bioactivity, 618
Bioavailable, 548
Biocompatibility, 44, 163, 180, 311, 341, 502, 722
Biodegradable polymers, 732
Biodegradable scaffold, 610
Biodegradable, 680
Bioglass®, 618
Biomaterial, 648
Biomimetic carbonate apatite coating, 655
Bioresorbable bone graft substitute, 311
Bleaching, 306
Blood coagulation, 13
Blood compatibility, 13, 204, 379
Bond strength, 712
Bonding procedure, 324
Bone cement, 1, 27, 94, 137, 272, 581
Bone defect, 526
Bone graft, 603
Bone ingrowth, 19, 107
Bone marrow-coating, 574
Bone remodeling, 514
Bone, 65
Bone-graft material, 245, 680, 689
Bone-implant contact, 520
Bracket, 765
Brushing abrasion, 227
BUN, 13

CAD/CAM, 65
CaF_2, 262
Calcification, 356
Calcium phosphate, 245, 526
Calcium sulfate, 487
Calcium-phosphate cement, 447, 689
Carbamide peroxide, 627
Carbon, 758
Catechol, 532
Cement composition, 457
Cement mixing method, 457
Ceramic on ceramic, 638
Chemical etching, 193
Chitosan, 603, 702
Chondrocyte, 610
Coils, 211
Cold isostatic pressure, 553
Collagen fibril, 287
Color change, 373
Color difference, 306
Color-measuring instrument, 373
Comparison of equipment, 239
Complications, 581
Compomers, 306
Composite, 217, 318, 539, 758
Compound action potential, 772
Connexin-43, 57
Constant-composition titration, 245
Copolymer, 697
Corrosion resistance, 331
Corrosion, 180
Covalent bonding, 217
Cytochrome c, 414

Degradation rate, 487
Degradation, 211, 287, 324, 618
Dental adhesives, 419
Dental biofilm, 627
Dental ceramics, 233
Dental resin composite, 280, 373
Dentin bonding, 712
Dentin, 399
Di-(2-ethylhexyl) phthalate, 204
Diametral tensile strength, 689
Dissolution, 245
DNA microarray, 341
Drug delivery, 559, 702
Dynamic fatigue, 233
Dynamic load, 186

ECM - extracellular matrix, 648
EDX, 99
EDXA, 38
Electrospun membrane, 675
Embolization, 211
Enamel, 399
Endothelial cell layer, 171
Endotoxin, 347
Esthetic wire, 765
Ethylene oxide, 548
Experimental study, 526
Expression profiling, 341
Extent of motion, 186
Extracellular matrix,586

F6H8, 133
Fatigue fracture, 299
Fatigue, 457, 712
Fiber-reinforced composite, 391
Flow-conditioning, 171
Fluorescence, 137
Fluoride gel 38,
Fracture healing, 150, 157
Fracture, 318
Freeze-drying, 732
Fretting, 78
Friction, 765
Frontal sinus and skull bone defect obliteration, 364
FRP, 765
Fused deposition modeling, 574

Gap junctional intercellular communication (GJIC), 57
Gap, 1
Gene expression, 163
Genotoxicity, 750
Glass, 262
Glass-ceramic, 70
Glottic incompetence, 666
Grades of wear, 638
Growth factors, 150
Guglielmi detachable coils (GDCs), 429

HA, 364
Hardness, 252
HDPE, 318
Heat pressing, 70
Hemocompatibility, 379
Hemostatic property, 680
Hip prostheses, 567
Hip simulator, 186
hip simulator, 410
Hip, 99, 750, 758
Hyaluronic acid, 586
Hybrid layer, 324
Hybridization, 414
Hydrogen peroxide, 306
Hydrothermal treatments, 520
Hydroxyapatite (HAp), 19, 27, 217, 429, 520, 532, 539, 603, 632, 689
Hydroxyapatite coating, 514

IGF-I, 157
Image-analysis system, 722
Immobilization, 13
Implant fixation, 447
Implant surface, 772
Implant-grade epoxy, 514
Implant-related infection, 593
In vitro testing, 78
In vivo failure, 299
In vivo fracture, 6
Infection resistance, 648
Interface, 1
Interfacial shear strength, 272
Internal adaptation, 712
Internal fixation, 539
Interventional radiology, 211
Intervertebral, 107, 121
Iodophenol methacrylate, 44
Ion release, 121
Ions, 750
Isothermal heat-conduction microcalorimetry, 487

Kangaroo, 356

LAL test, 347
Leachable template, 732
Ligament augmentation, 697
Long-term animal study, 539
Low temperature synthesis, 632
Low-pressure RF-generated plasma, 239

Macrophage response, 487
Margin analysis, 712
Maxillofacial prosthesis, 252
Measuring aperture size, 373
Mechanical properties, 27, 44, 233, 618
Mechanically assisted crevice corrosion, 78
Mechanics of bone substitutes, 311
Medial device, 548
Mercury, 627
Metabolic cooperation assay (MC assay), 57
Metallic biomaterials, 6, 299
Metals, 180
METASUL, 750
Methacrylate, 414
Mica, 70
Microfabrication, 741
Microleakage, 399
Microrough surface, 163
Microseparation, 567
Microtensile tests. 419
Modified ASTM F746 potentiostatic and scratch tests, 331
Modular hip prostheses, 78
Modulus, 318
Molecular weight between the crosslinks, 252
Multipurpose solution (MPS), 57

N,N-dimethylaminobenzyl alcohol and 4,4′-dimethylamino benzydrol, 502
Nanoparticles, 559
Necrosis, 581
Nerve conduction, 772
Nerve guide, 702
Nerve regeneration, 702
Nickel, 121
Nitinol surface treatment, 331
Nitinol, 107, 121

O_2/CF_4, 239
Occlusion device, 211
Oral bacteria, 627
Oral implants, 772
Orbital reconstruction, 574
Orthodontics, 765
Orthopedic surgery, 648
Osseointegration, 107
Osteoblast, 157, 680
Osteoconductivity, 19, 262
Osteogenesis, 163
Osteointegration, 655
Osteomyelitis, 593

Parallel plate chamber, 379
Partially fluorinated alkanes, 133
Particle distribution, 741
Paste, 603
Percutaneous implantation, 217
Perfluorocarbon liquids, 133
Perfluorohexyloctane, 133
Perfusion, 419
Phase evolution, 632
Photocurable tissue adhesive glue, 439
PhotoFix, 171
Photogelation, 439
Plasticizer migration, 204
Platinum plate (Pt plate), 429
PMMA precoating, 272
Poly (L-lactic acid) (PLLA), 610
Poly(D,L-lactide) coating, 157
Poly(dimethylsiloxane), 252
Poly(EGDMA/HEMA), 13
Poly(ethylene glycol) diacrylate, 439
Poly(lactic-co-glycolic acid), 559
Poly(L-lactide), 539, 697
Poly(L-lactide-co-glycolide), 697
Poly(methyl methacrylate), 502
Poly(propylene fumarate) (PPF), 65
poly(propylene glycol-co-fumaric acid), 311
Poly(vinyl chloride), 204
Poly-ε-caprolactone networks, 722
Polycaprolactone scaffold, 574
Polydimethylsiloxane, 666
Polyethylene wear, 186
Polyimide backing, 514
Polymer, 548
Polymerization, 373
Polymerization, 414
Polymethyl methacrylate (PMMA), 1, 262
Polytetrafluoroethylene, 666
Polyurethane, 675
Porcelain inlay, 553
Porcine, 356
Porous biomaterials, 311
Porous structures, 732
Porous, 107, 121
Potentiodynamic, 331
Power optimization, 239
Precipitates, 331
Premixed pastes, 689
Progesterone, 702
Proinflammatory cytokine, 347
Proliferation marker, 150
Prostheses and implants, 666
Prosthesis, 702, 750
Pseudomonas aeruginosa, 94
Pyrogenicity, 347

Radiopacity, 44
Rapid prototype, 65
Rat model, 163, 593
Rat primary retinal cultures, 133

Rat, 150
Removal torque value, 520
Resin composites, 712
Resin-based restorative materials, 227
Resistance, 94
Resorption, 245
Restorative materials, 391
Retrieval analysis, 6
Retrieved study, 638

Salivary proteins, 391
Salting out, 559
Sandblasting, 38
Scaffold, 648
Scar, 586
Scoliosis, 6
Scrape loading and dye transfer (SLDT assay), 57
Self-etching primers, 399
SEM, 38, 99, 287, 638
Shear bond strength, 38
Silicone elastomer, 217
Simulator study, 638
Simulator, 567
Small-diameter vascular graft, 171
Sphered particles, 553
Spinal fusion, 107, 121
Spinal implants, 6
Staphylococcus aureus, 593
Sterilization techniques, 722
Sterilization, 239
Stiffness, 697
Storage regime, 227
Strain gauging, 514
Strength, 697
Streptococcus mutans, 391
Stress, 318
Stress-corrosion-cracking, 331
Styrene-derivatized gelatin, 439
Subcritical crack growth, 233
Subcutaneous implants, 356
Surface analysis, 121
Surface chemistry, 532
Surface modification, 13, 78, 204
Surface roughness, 227
Surface texture, 741
Surface treatment, 19, 193

Tantalum coating, 425
Tear strength, 252
TEM, 287
Temperature, 581
Tensile tests, 419
Test frequency, 457
Tetracalcium phosphate, 632
Textured microstructure, 70
TGF beta, 586
TGF-β1, 157
THR, 638
Thrombus formation, 429
Ti6Al4V alloy, 299
Tissue engineering, 65, 574, 610, 732
Tissue reactions, 364
Titanium fiber mesh, 19
Titanium implants, 447, 520
Titanium, 38, 121, 341, 772
Titanium-nickel, 107
Tobramycin, 94, 137
Tooth bleaching, 627
Tooth, 306
Toothbrushing, 180
Toothpaste, 180
Total hip arthroplasty, 272, 299
Total hip prosthesis, 186
Total joint arthroplasty, 758
Toxicity, 548
Tribology, 280

UHMWPE acetabular cup, 272
UHMWPE, 741
Ultra-high-molecular-weight polyethylene, 487
Urease, 13

Vertebroplasty, 581
Vicryl® sutures, 618
Visible light, 439
Vocal-cord medialization, 666

Wall shear rate, 379
Water storage testing, 287
Water storage, 324
Wear debris, 758
Wear measurement, 280
Wear particles, 741
Wear resistance, 410
Wear testing, 280
Wear, 280, 567
Whole blood incubation, 379
Wound dressing, 347, 675
Wound healing, 586, 675

XPS, 99
